

COMPANY --- PROFILE

www.cropit.org

ABOUT US

CropIT is an independent, mission-driven company, building a trusted digital platform and deploying technologies to empower communities of farmers to be more successful. To date, +1 million farmers have connected with us for better success, and we have been involved in some of the largest agricultural initiatives in Nigeria.

CropIT solution is backed by robust technology, trained and digitized agricultural extension agents working closely with farmers to enhance agricultural productivity by providing extension and advisory services, monitoring and evaluation of production, and post-harvest activities, which resulted in effective capacity building and risk management.

OUR VISION

To become the fastest growing Agri Tech start-up and one of the very few companies providing end-to-end solutions to the farming communities, financial institutions, NGOs, government, and other Agri-players through a scalable innovative digital-focused strategy.

OUR MISSION

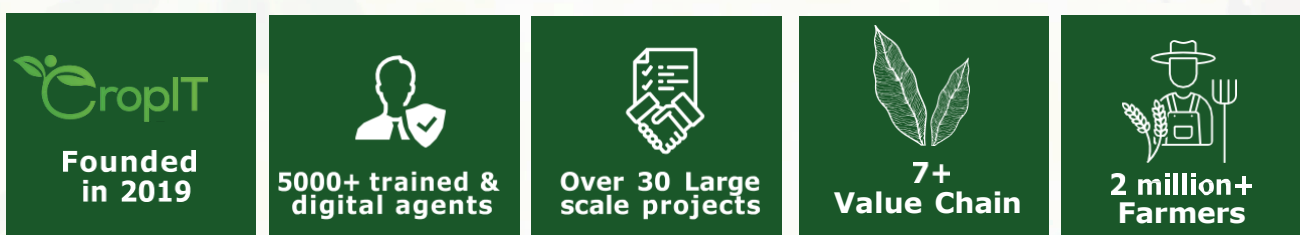

To deliver effective and flexible agribusiness solutions that will improve the performance of our clients through innovative; digital, precision and climate smart agriculture and enable finance to the ecosystem. To become a trusted partner to financial institutions, NGOs, and the clients we work with.

CROPIT

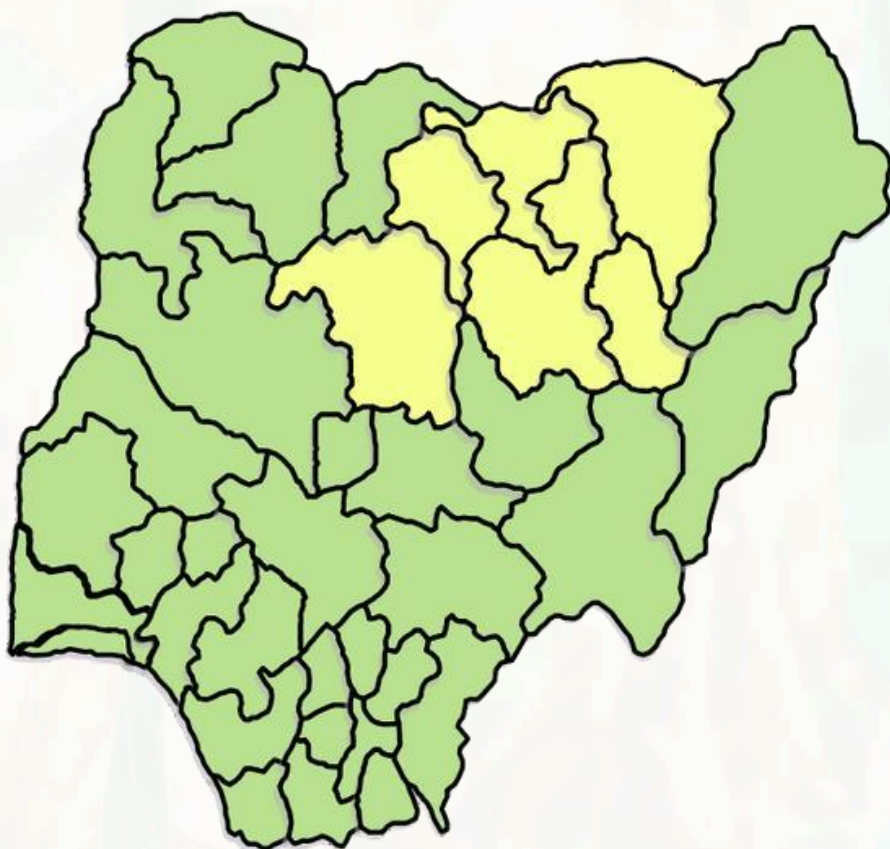

FACT SHEET

CropIT Nigeria Limited is a full-stack Agtech Company that provides comprehensive solutions to improve the livelihoods of smallholder farmers. We are leading the way by empowering extension officers and smallholder farmers with technology and new innovations for sustainable food security and supporting financiers on recovery and finance.

CropIT over the years has positioned itself as the leading agribusiness solution platform in Africa.

OPERATIONS

Worked in all 37 States of the federation with strong agent presence in all.

The 6 States we have executed GIS smart sourcing and procurement.

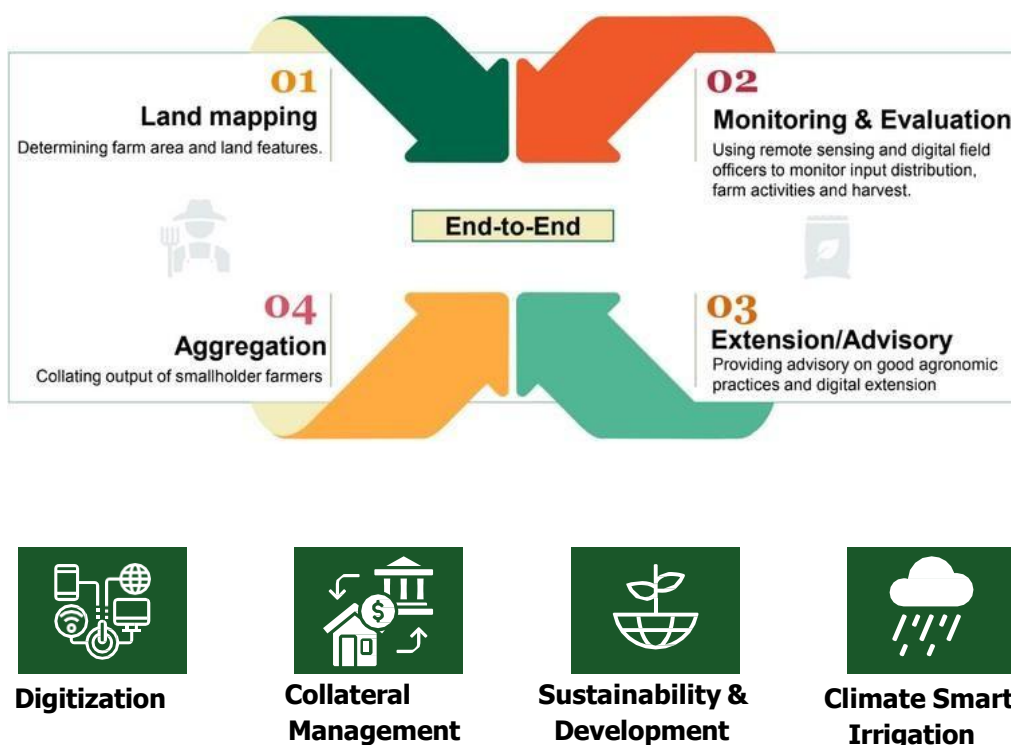

Strategic partnerships with International Institute of Tropical Agriculture Business Incubation Platform (IITA-BIP) and the National Agricultural and Extension Research Liaison Services (NAERLS).

VALUE PROPOSITION

Smallholder farmers in emerging markets face difficulties in accessing finance due to a lack of structure, transparency at the last mile, low productivity, risks emerging from hazards, and lack of access to key resources like knowledge, as well as good inputs and chemicals to prevent pests and diseases. As a result, farmers may struggle to achieve financial stability. Due to the limited resources at their disposal, many farmers are especially vulnerable to these challenges.

Agricultural support services can improve smallholder farmers' knowledge about new farming trends, and digital farming empower them to employ mitigation strategies in response to climate change and allow financial institutions, NGOs and investors direct more funds and resources to the last mile.

Solution

By digitalizing and bringing transparency into the last mile while ensuring effective extension, monitoring, maximum yield and effective access to the market.

OUR PRODUCTS & SERVICES

Monitoring and Evaluation

CropIT pride itself as the largest monitoring company in Nigeria for agricultural development. Our team covered over 2 million hectares in 7 value chains. CropIT understands the dynamics of using technology to monitor project status and progress reports across Nigeria, our expertise and innovative approach give value to our clients.

Extension Support

With over 1,000 digital extension workers our team of agricultural extension experts support farmers and clients, every step of the way, providing them with the knowledge and expert support they need to implement the best farming practices and agricultural operations. The purpose of this service is to help farmers and clients exceed their crop production and agricultural goals through our well-trained field agents.

Capacity building & Knowledge Transfer

We develop training and learning resources that are adapted to meet the needs of all classes of agricultural stakeholders.

Digital Market Linkage Input and Aggregation

We bridge the gap between actors in the agricultural value chain, fixing the market linkage problem that has affected African smallholder farmers since time immemorial. Today, we have facilitated the trading of over 32,000MT of Inputs and commodities and billions in value.

OUR PRODUCTS & SERVICES

Digital Agronomy

We understand the numerous challenges and responsibilities that farmers face in managing critical farming elements such as knowing the input to use, pests and diseases, while also ensuring the soil and environment are not put at risk by their farming practices. This is where our Agronomists come in to assist farmers with good practices and technologies that will strengthen their agricultural practices, improve their yields and supports their prosperity.

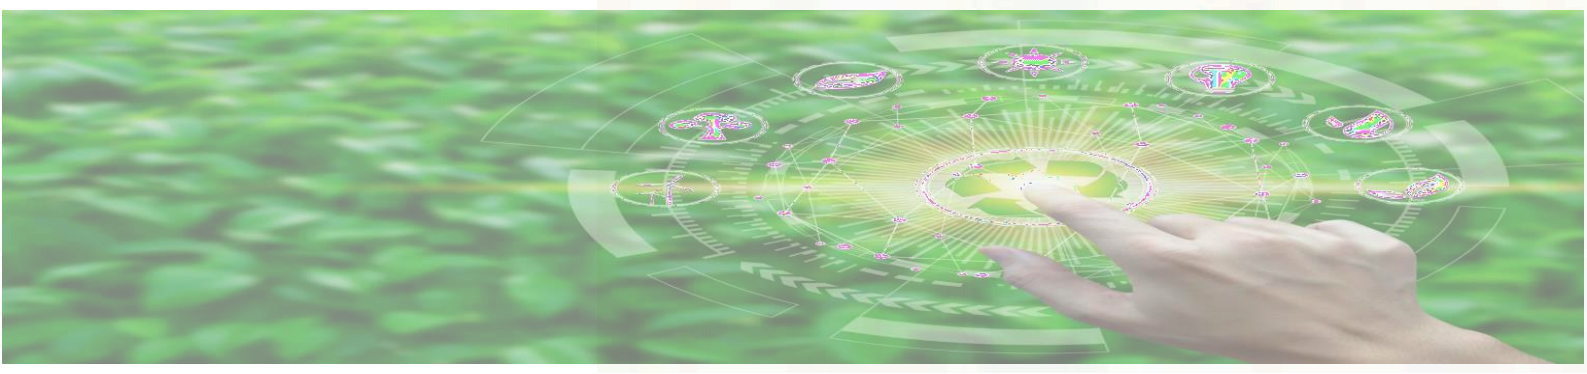

Irrigation

CropIT represents some of the largest irrigation companies in the world offering Irrigation as a service to commercial farms, smallholder farmers and out-grower projects. We understand that to increase agricultural productivity in Nigeria, we cannot rely on rain-fed farming alone. Hence, the need for an enabling and well-structured irrigation service, geared toward supporting an increase in yield and prosperity of smallholder farmers and other agricultural actors.

Mapping/Land Management Services

Land is at the center of cropping, therefore knowing the correct size and nutrient requirement of agricultural land is important for good planning and results. Our Land Management System allows for precise calculation of farm size using GPS coordinates, analysis of soil type and nutrient composition of the farmland and then computation of input.

SELECT PROJECTS

MONITORING, MANAGEMENT & DIGITAL

National Agricultural Growth Scheme and Agro-Pocket (NAGs-AP)

Service: Digitalization of Input Redemption/Distribution and Digital Advisory

Nature of Work:

- Provision of digital platform for over 500,000+ farmers to redeem input across 13 states for the 2023 dry season, 2024/2025 wet and dry season.
- Deployment of trained field officers with devices (tablets) across the entire states
- Digital monitoring and advisory service to all farmers, from planting to harvest
- Deployment of trained extension officers, data analyst and GIS expertise on the project for monitoring, controlling and coordination.

National Agricultural Development Fund (NADFund)

Service: Farm Management End to End Services

Nature of Work:

- Provision of digital platform for 5,000 farmers to redeem input in Kaduna state for the 2024 wet season.
- The provision of endline impact evaluation service using a qualitative and quantitative approach
- Deployment of trained extension officers, data analyst and GIS expertise on the project for monitoring, controlling and coordination.
- Digital monitoring and advisory service to all farmers, from planting to harvest
- Plot analytics of all the farms to ascertain suitable, yield expectation and productivity.

First City Monument Bank (FCMB)

Service: Farm Management End to End Services

Nature of Work:

- Farm management across states in the south west for the dry, wet and dry season in 2023 and 2024.
- The provision of endline impact evaluation service using a qualitative and quantitative approach
- Deployment of trained extension officers, data analyst and GIS expertise on the project for monitoring, controlling and coordination.
- Digital monitoring and advisory service to all farmers, from planting to harvest
- Plot analytics of all the farms to ascertain suitable, yield expectation and productivity.

SELECT PROJECTS

MONITORING, MANAGEMENT & DIGITAL

Eco Bank

Service: End to End Services, Collateral Management

Nature of Work:

Provision of input distribution, mapping, digital extension and monitoring services for 73,000 maize farmer under the CBN-ABP Wet Season 2020, Maize growers association.

Provision of digital extension and monitoring services for 5,000 rice farmers SWAGCO project.

Keystone Bank, Unity Bank , Cotton Association, NACOTAN

Service: Farm Management, End to End Service

Nature of Work:

Provision of Input distribution, mapping, Digital Extension Services Management and Monitoring of cotton aggregation for 110,000 cotton farmers during the 2019 wet season production

Provision of Digital & Extension Services Management and Monitoring of cotton aggregation for 200,000 cotton farmers during the 2020 wet season production

Dangote

Service: Service Delivery Model 2017 - Date

Nature of Work:

Development and implementation of sustainable sourcing models for the production of 1,000,000 MT of paddy rice to optimally feed 160MT/Hr integrated rice mills across Nigeria.

Nature of Work:

Management of 20,000+ smallholder out-grower scheme and youth social enterprises across Jigawa, Kano, Zamfara, Sokoto, Kebbi, Kogi, and Oyo States involving farmer profiling and selection, clustering, farmland mapping, input disbursement, training and extension service and guaranteed off-take.

Keystone Bank, Unity Bank – Maize Association of Nigeria, MAAN

Service: Monitoring services

Nature of Work:

Provision of digital extension and monitoring services for 79,000 maize farmers under the CBN-ABP Wet Season 2020

International Beverage Company

Service: smart Agri-Sourcing and Procurement

Nature of Work:

Leveraging GIS, remote sensing and AI, ML to optimize crop detection, yield estimations for smart sourcing and procurement in 6 States in Nigeria.

SELECT PROJECTS

MONITORING, MANAGEMENT & DIGITAL

Heritage Bank

Service: Monitoring Service, collateral management

Nature of Work:

- Provision of input distribution, extension and monitoring services for 20,000 rice farmers under the CBN-ABP Wet Season 2021/Dry Season 2021
- Provision input distribution, extension and monitoring services for 70,000 wheat farmers under the CBN-ABP Dry Season 2021

NIRSAL MFB

Service: End to end Services, collateral management

Nature of Work:

- Provision of Mapping, Input distribution, Digital & Extension Services Management and Monitoring of cotton aggregation for 65,000 cotton farmers during the 2021 wet season production.

Sterling Bank

Service: Monitoring services, collateral management

Nature of Work:

- Provision of Digital & Extension Services Management and Monitoring of cotton aggregation for 5,000 maize farmers during the 2021 wet season production.
- Provision of Digital & Extension Services Management and Monitoring of cotton aggregation for 5,000 rice during the 2022 wet season production.
- Thriveagric: Digital & Extension Services Management and Monitoring of cotton aggregation for 120,000 maize farmers during the 2022 wet season production.
- SWAGCO: Digital & Extension Services Management and Monitoring of cotton aggregation for 5,000 maize and cassava farmers during the 2022 wet season production.

Royal Exchange

Service: Monitoring Service, claim validation and crop cutting

Nature of Work: Claims validation for wet season 2022

-

SELECT PROJECTS

IRRIGATION, GRANTS

National Sugar Council

Value: 100 Million USD

Nature of Work:

Over 20,000ha for Dangote, BUA and FMN sugar development

SELECTED CLIENTS TOMATOES, PALMS & VEGETABLES

Value: 10 million USD

Nature of Work:

- Over 3,000Ha tomatoes irrigation projects for Tomatoes Jos, Olam and GB Food
- Over 10ha of high-end greenhouses such as Hosa Farms and ARM.

Selected nurseries for Palm Oil plantations such as Dufill and Presco.

Mercy Crop Rural resilience

Value: 1 Billion NGN

Nature of Work:

Rural Resilience Program (Agripreneur Project 2021). Selection and Training of over 60 youths (50% females) who will become Agripreneurs to interface with over 3,000 farmers using modern-day storage facilities (Cocoon) in their community in Gombe State.
