

PAST PROJECTS & CONTRACT EXECUTION

The company has a proven track record in the **contracted supply of high-quality seeds** to government agricultural programs and international development organizations across Nigeria. We specialize in large-scale seed production, processing, and timely delivery, consistently meeting contractual obligations and quality standards. All engagements listed below were executed on a **contract basis**, with successful delivery and full payment completion, demonstrating our reliability, technical capacity, and financial credibility.

- **Kaduna State Agricultural Development Programme (KADP) – Ruwan Sanyi & Ludduga Clusters**
The Company was engaged as a contracted seed supplier under the Kaduna State Agricultural Development Programme, where we supplied **certified, high-quality seeds in large quantities** to support cluster-based farming initiatives. Our delivery contributed to improved crop productivity within the Ruwan Sanyi and Ludduga agricultural clusters. The contract was executed successfully, with all supply obligations fulfilled and payments duly completed.
- **Kebbi State Agricultural Development Programme (KADP)**
Under a formal supply arrangement, we provided **bulk quantities of improved seeds** to support agricultural production programs in Kebbi State. Our seeds met required quality and certification standards, ensuring enhanced crop performance for beneficiary farmers. The contract was delivered efficiently, and all financial obligations were honoured upon completion.
- **Pyxera Global – Rayuwa Project, Katsina State**
The Company served as a contracted supplier for the Rayuwa Project implemented by Pyxera Global, delivering **large volumes of certified seeds** to project beneficiaries across Katsina State. Our role focused on ensuring timely availability of quality inputs to farmers participating in the program. The contract was executed to specification, with successful delivery and confirmed payment.
- **Nuru International – Community Development Initiative, Adamawa State**
In partnership with Nuru International, our company supplied **high-quality agricultural seeds at large scale** to support community-based

agricultural interventions. Our seeds contributed to improved farm yields and livelihoods within target communities. The supply contract was completed successfully, with all deliverables met and payments received as agreed.

- **Gombe State Government – Agricultural Input Supply Programme**

The company successfully executed a contract for the supply of **bulk quantities of certified, high-quality seeds** to the Gombe State Government in support of its agricultural development and food security initiatives. The supply was delivered in full compliance with agreed specifications, contributing to improved access to quality inputs for farmers across the state.

This engagement aligns with the Gombe State Government’s ongoing agricultural support programmes aimed at enhancing farmer productivity. Notably, the state has implemented initiatives such as **input distribution programmes for farmers during the wet season**, ensuring timely access to essential agricultural inputs at the grassroots level. In addition, broader interventions such as the **Rural Access and Agricultural Marketing Project (RAAMP)** focus on improving agricultural productivity by facilitating access to inputs, markets, and rural infrastructure for smallholder farmers

STRATEGIC PARTNERSHIPS & INPUT SOURCING

We maintain strong partnerships with reputable institutions to ensure the continuous production and supply of **certified, high-performing seeds** that meet national and international standards.

- **National Agricultural Seed Council (NASC)**

We operate under the regulatory oversight of NASC to ensure compliance with seed certification standards, quality control, and genetic purity throughout our production processes.

- **Institute for Agricultural Research (IAR)**

Our collaboration with IAR provides access to breeder and foundation seeds, as well as technical expertise in seed cleaning, processing, and

quality assurance, forming the backbone of our seed multiplication system.

- **National Cereals Research Institute (NCRI), Badeggi**

We source high-quality foundation seeds for key crops including rice and soybean from the National Cereals Research Institute (NCRI), Badeggi. This research institute is one of Nigeria's leading agricultural research institutions. This ensures access to scientifically developed, high-yielding, and adaptable seed varieties, guaranteeing consistency in performance and supporting our certified seed production operations.

- **Eco-Basic Seed Company**

We partner with Eco-Basic Seeds for improved varieties including PBR Cowpea and hybrid maize, enabling us to supply climate-resilient and high-yielding seed options.

- **Value Seeds Limited Company**

Value Seeds Limited supports our operations through the provision of foundation seeds across multiple crop categories, ensuring continuity in our production pipeline.

- **African Agricultural Technology Foundation**

Through AATF, we participate in the production of certified PBR seeds, including advanced and biotech varieties, strengthening our contribution to agricultural innovation and food security.

Operational Presence & Market Accessibility

- The company maintains a strong operational presence across both **rural farming communities and key urban centers**, strategically positioning our offices to ensure seamless access to our products and services.
- Our rural-based offices enable close engagement with farmers, allowing us to provide timely access to **certified, high-quality seeds**, technical support, and efficient distribution at the grassroots level. This proximity enhances trust, improves last-mile delivery, and ensures that farmers receive inputs when they are most needed during the planting seasons.
- In parallel, our urban offices serve as administrative and commercial hubs, facilitating coordination, logistics management, and partnerships with government agencies, development organizations, and agro-dealers.

- By integrating both rural and urban operational structures, the company ensures that its products remain **readily available, efficiently distributed, and competitively priced**, making improved seeds accessible and affordable to smallholder and commercial farmers alike.

CAPACITY STATEMENT

Our experience in executing multiple seed supply contracts across different states and development programs demonstrates our ability to:

- Deliver **large volumes of certified seeds** within agreed timelines
- Maintain **strict quality control and compliance standards**
- Manage **end-to-end seed production, processing, and distribution**
- Build and sustain **trusted relationships with government, NGOs and international Organizations.**

We remain committed to supporting agricultural transformation through the reliable supply of high-quality seeds that enhance productivity and ensure food security.
